

Environmentally Friendly

Cleaning your grill

- Use the carrying bag to bring the grill home, where you can clean the grill with hot water, detergent and a brush.
- When camping, the grill can be cleaned with a steel brush over an open fire. The steel brush accessory will be provided next year.
- If at a beach, you can add half an inch of sand in the bottom of the grill to absorb dirt from the grilling process and then remove the sand after use.
